Various structural steel fabrication.

Robot Steel Pole

Postop Light Steel Pole

Sports Field Steel Pole

Streetlight Steel Poles

Turbine Steel Pole

Installation and Rigging:

At Global Steel High Mast and Steelpole Fabricators, we take care of every aspect of the installation process. From foundation work to the precise assembly and rigging of structures, our skilled team handles the entire installation process with efficiency and expertise. We prioritise safety and adherence to industry standards, ensuring that all installations meet the required specifications.

Data Pack and Documentation:

We provide our clients with a comprehensive data pack with all necessary documentation upon project completion. These data packs serve as a valuable resource for our clients, containing essential information related to the project, ensuring transparency and facilitating future maintenance and reference.

Design and Engineering:

We offer our clients design, engineering drawings, and lighting proposals upon request. Our experienced professionals collaborate closely with clients to understand their requirements and develop customised solutions. We provide innovative and efficient designs that meet the highest industry standards by employing advanced design techniques and leveraging our expertise.

ISO 9001: 2015 Certified Factory:

Our factory, located in Alrode, Alberton, operates under the ISO 9001:2015 quality management system. This certification reflects our commitment to maintaining exceptional manufacturing processes and delivering products that consistently meet or exceed customer expectations. Global Steel High Mast and Steelpole Fabricators adhere to strict quality control measures to ensure our products meet the highest standards.

Manufacturing Standards:

We manufacture and fabricate our products by various industry standards. All our designs comply with SANS 0225 specifications, and our poles and masts are manufactured to ISO 9001:2008 standards. To ensure durability and protection against corrosion, all our products undergo a hot-dip galvanisation process by SANS 121/SABS 1461. Our poles and masts are manufactured from Grade S355 steel, conforming to SANS 657/1&3 requirements. We also provide design certificates signed by a registered Professional Engineer upon request.

Local Manufacturing:

As a proudly South African company, we manufacture all our products locally. By manufacturing in-house, we have complete control over the production process, ensuring the highest quality standards, timely delivery, and supporting the local economy.

Global Steel High Mast and Steelpole Fabricators are dedicated to providing our clients with superior streetlight poles, high mast structures, and related products. With our extensive experience, commitment to excellence, and customer-centric approach, we strive to be the preferred choice for all your street lighting and high mast requirements.
